

Special Feature: TV-Brussels broadcast.

TV Brussels is the local TV-station in Brussels. Some sites are:

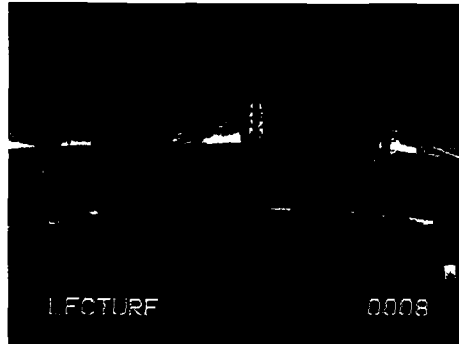

<http://www.tv-brussel.irisnet.be/>

<http://tv-brussel.vgc.be/>.

This TV station broadcasted briefly on the Mat@mium event, during its news broadcast.

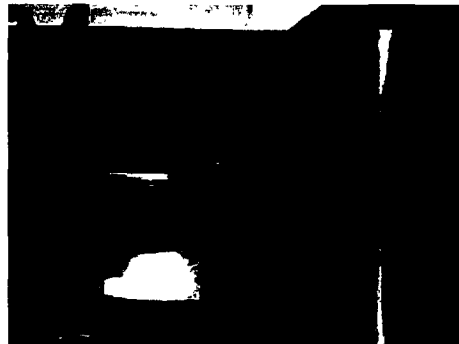

Below are some images from that broadcast.

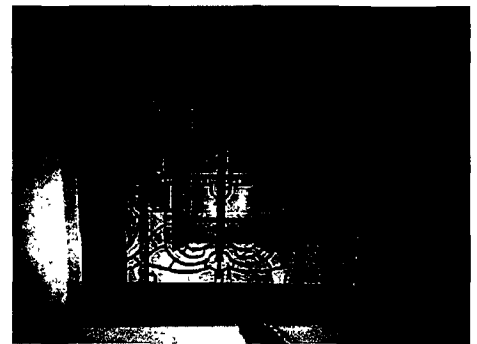

General view on the conference room, inside one of the spheres of the Atomium.

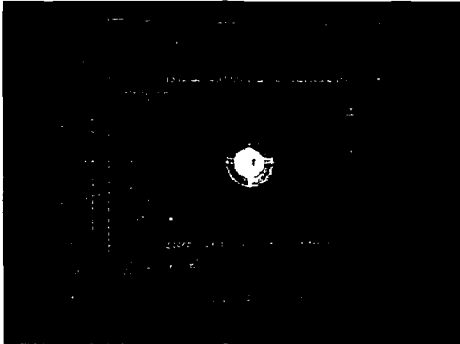

D. Nagy and T. Tarnai, attentively listening to the introduction.

D. Nagy during his introduction.

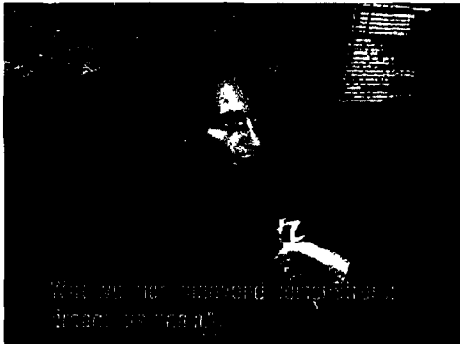

D. Nagy linked Horta to mathematics and the Belgian environment.

Next was LABau's turn, with a musical performance inside the Atomium.

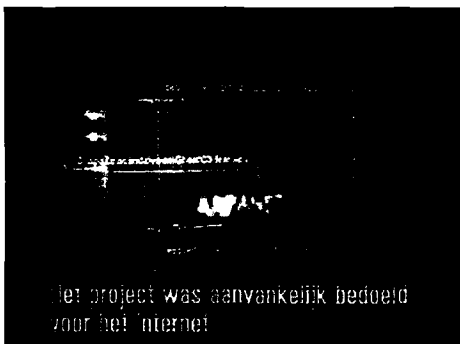

It took a lot of preparation to get everything installed in the 9 spheres building with its many stairs and escalators.

"What we demonstrate here tonight is called: Space Navigable Music."

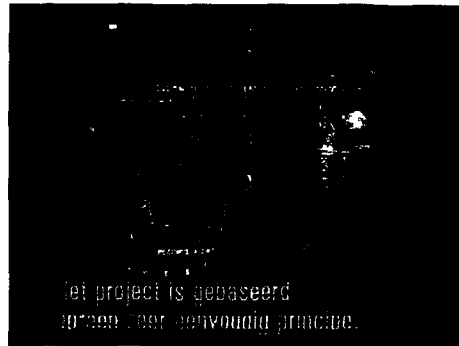

The project links architecture, music and images.

The project was initially meant for the Internet ...

... but it has grown to a live-act with musicians.

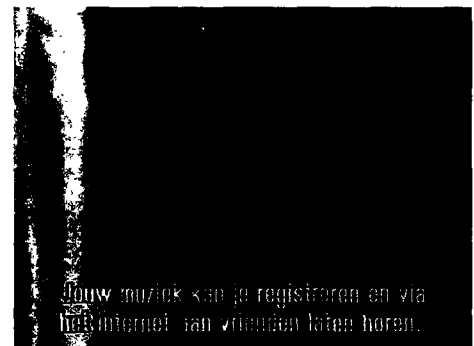

The project is based on a very simple principle.

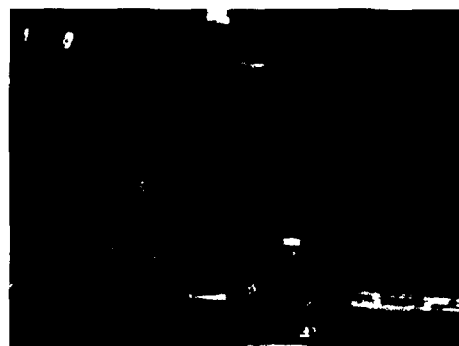

One has a three-dimensional space where movement is free.

By moving through that space, you make music.

You can record your music and let your friends listen to it through the Internet."

LABau's presenter became part of his own show.

Spectators came in large numbers, and even had to sit on the ground
